

Current Topics of Nanostructure Physics

Winter Semester 2024-2025

Status

Time	Thursdays, 13:00-15:00
Place	A4.326

Date	Author	Topic
07.11.2024	Maja Groll	Simulation of electron interactions with few atoms
21.11.2024	Harikrishnan Venugopal	Memristive devices
09.01.2025	Janna	Recent progress in sub-10 nm patterning of surfaces
16.01.2025	Felix Lohmeyer	Dewetting on prepatterned substrates
30.01.2025	Vinay Kunnathully	Latest results in electron microscopy of metallic alloys
